SEPA Environmental Event Report

Action received SCC notification 14:32 regarding odour complaint from 2 sisters. SCC tried to do ringround but got unity
Description message? so was not put directly through to the team at time. The SCC report said advising of "disgusting
smell" "house full of it" "like rotten chicken" Same smell as is always emanating from the factory, all the time its the same
smell. Its fine and then all of a sudden it flares up again. should't have to shut windows in summer. can smell it when
breathing . a ten out of ten on the scale. When you hang out washing it smells of it. advised in the report it started
smelling about 10:30am ..toned down a bit but was then back. advised did not really see a pattern,
never really used to smell it that much up here, usually further down the town. Had to close windows. Still warm, dry,
"muggy", cloud cover. not really any wind.

14:40 back and spoke with asked if it was still odourous so that might substantiate
it but advised the odour had gone. I asked to describe the odour said definitely chicken odour (not
STW or bio gas) I asked if noticed and odour yesterday and said yes around tea time (env/0892397).

15:00hrs contacted at 2 sisters to advise him we had received another complaint. He said he had
been on site all morning and nothing obvious as to what might have been causing the problem. He was going to take a
look round site.

EK also contacted (P&K council) to enquire if any problems at kiethick- no issues.

NFA at present- odour not substantiated as complainant advised that odour had gone. Ongoing work with site to
address potential odour issues.
